Networking Loadmaster

To run Loadmaster across a network, install the program on all workstations and select the **shared data directory** that everyone has read/write access too.

NOTE: Make sure everyone is out of the system before doing this.

🐋 Data Directory	
Current data directory C:\ProgramData\ZipZa	ap Computers\Loadmaster\ Close 🙁
NOTE: If you have just performed a program up may require alteration. If using Windows Vista PARAMETERS and check the settings at the bot	pdate then the above line should refelect where your data is held and or WIndows 7 on a network drive then you should then go into LOCAL tom of that screen.
Vista & Win 7Current Data Drive C:	Vista & Win 7 current drive letter URL
Choose new directory	Click Modify
■ Desktop ▷ Debbie	Select the Shared Data Directory,
Public Computer Eccal Disk (C:)	Click OK
 DVD RW Drive (D:) Removable Disk (E:) node (\appello) (O:) 	Click Close.
▷ 💇 Network	NOTE: All workstations must point to the same data path
Make New Folder OK Cancel	

NOTE: If you are running Windows Vista or Windows 7, enter the drive letter URL (Path address) in which the data is held on. To find out the Drive URL, go to **Setup, Local Parameters** and click **Get URL**.

🔌 Data Directory	×
Current data directory Q:\Loaddata\	Close 🔀
NOTE: If you have just performed a program update then the above line should refelect where your data is held and may require alteration. If using Windows Vista or WIndows 7 on a network drive then you should then go into LOCAL PARAMETERS and check the settings at the bottom of that screen.
