

ABOUT US

We mainly write Windows based computer software! Much of it is for the parcel, pallet or container industries although we have diversified into writing programs for warehousing, security access and credit control agencies.

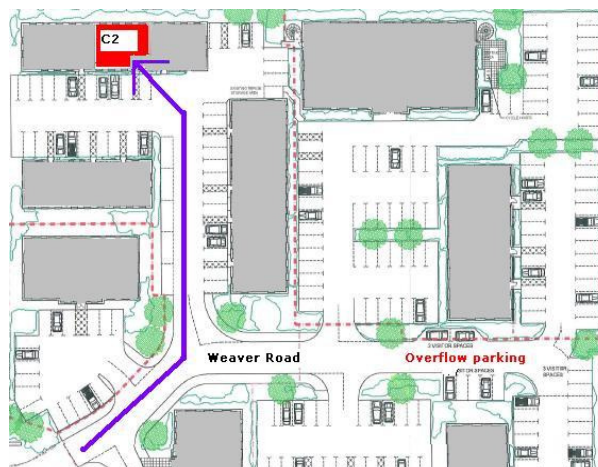

Our customers come from all over the United Kingdom, the Republic of Ireland and some as far as the United Arab Emirates. These include household names.

We were originally established in 1986 as a partnership and changed to a Limited Company in 2004. We moved to our current address in October, 2007.

We are a Microsoft Registered Partner and operate under the code of conduct of the Institution of Analysts and Programmers.

From A1 North take A57 at Markham Moor towards Lincoln. At Lincoln by-pass roundabout go right and head towards Newark. Turn left immediately after passing the Pride of Lincoln PH into Whisby Road. Take the next road left then after 100 metres turn right into Weaver Road. We are in unit C2.

HAZINFO

The Informer of
Hazardous Substances

Approved Carriage List

This includes:

United Nations Numbers

Classifications

Secondary Hazards

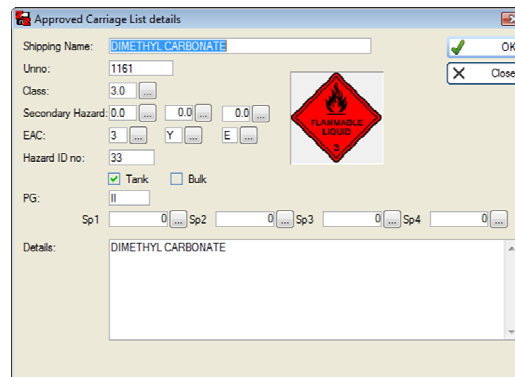

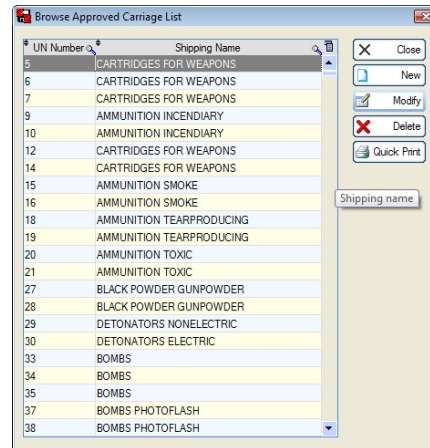

Emergency Action Codes

Hazard ID Numbers

Special Provisions

Hazchem is a United Nations standard for the classification of hazardous substances. Hazinfo simplifies the understanding of this complex system by showing what the symbols and codes actually mean in simple terms.

Part of the Hazchem plate describes how an emergency service should deal with an incident pertaining to the vehicle or facility.

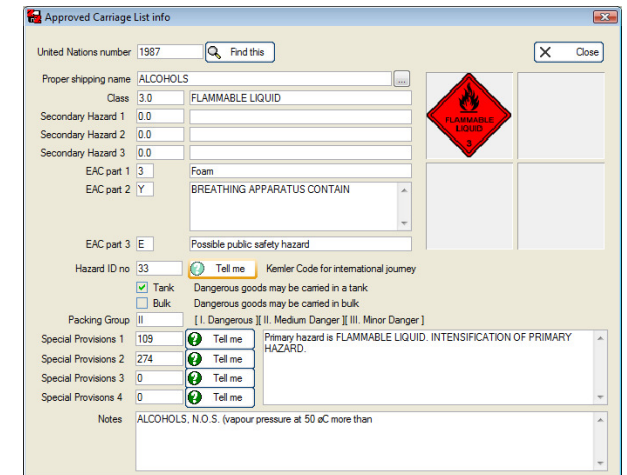

In ACL Info you have the Ability too:

Search the Approved Carriage List by UN Number and Shipping Name

View the details of Kemler codes and Special Provisions

View the details of EAC codes, Classifications and Packing Groups

View any Notes about the substance

In the program you also have the ability to search and view Kemler codes.
