

ABOUT US

Our main expert area historically has been the production of bespoke computer programs for the Windows, Linux or Mac platforms.

We currently produce software for a number of diverse industries but one area that we have specialized in is writing programs for the European logistics market where we have been producing systems for major national parcel and pallet delivery companies for over 20 years.

We produce groundbreaking bespoke software design and code production at the cutting edge of development. We are also internet scam busters, cyber security advisors and computer good guys. When you really need help then just scream and we will dig you out of the hole.

Yes, we fully understand Windows, Linux, hardware, software, networks, security, apps, legalities and the needs of the customer.

It's due to the experience we have gained over 20 years.

Our normal office hours are from 9.00am to 5.00pm from Monday to Friday.

We do not open on UK Public Holidays.

We are a small friendly company which consists of real people operating from real premises. All of our developments are unique and fully 'in house' for the security and reassurance of our customers. Nothing is outsourced to any other third party.

We do not farm out to cheap sub-contractors in third-world countries then claim their work to be our own, nor do we claim any qualifications that third-parties may have and try to claim them as ours.

ZIPZAP Computers Limited is registered in England.

Company No. 4576382

VAT Registration GB 526 1163 71

Data Protection Act Registration Z8209425

We operate under the ethical policies and codes of conducts of both the British Computer Society and the Institution of Analysts and Programmers.

Traffic Reporting

- ⇒ Drivers Job Sheets
- ⇒ P.O.D.s
- ⇒ Traffic Sheet Report
- ⇒ Jobs by Resource Reports
- ⇒ Subcontractors Confirmation Notes
- ⇒ C.M.R. Notes
- ⇒ Invoice Summaries
- ⇒ and many others

What Does It Do?

- ⇒ It works the way you do.
- ⇒ You receive a collection request from your customer and you enter it into the system.
- ⇒ Sends Collection data to delivery agents via the web or to a handheld device.
- ⇒ Receives delivery data from delivery agents by importing it.
- ⇒ Produces reports to show customer activity.
- ⇒ Full invoicing with multiple rate schemes.
- ⇒ Sage export.
- ⇒ Currently in use by depots in TPN, Fortec, Palletforce and TNT as well as many other sites in the UK and Ireland.
- ⇒ Constantly updated to meet customer changing needs.

Meet critical delivery deadlines and improve your coverage with the ZIPZAP's Loadmaster TMS scheduling solution.
