

ZipZAP Help sheet - Tables

Have you noticed this little symbol on most tables?

If you click it then you will get this.

It allows you to do a number of things, including exporting the columns to Excel, Word or XML.

If you want to just see certain columns only then you can select them and turn them on or off using the 'Select Columns' option. Most tables 'remember' what you chose and will show it like that the next time you use it.
